❑ Effectiveness Metrics

- Before submitting or continuing, the registration form should be able to notify the user of any errors they have committed. The errors should be presented so that it is simple for the user to locate and fix the error. As a result, the data we get from the user will be more accurate.
- 2 metrics
 - 1. Form validation.
 - Its is checking for valid email id and contact number
 - 2. Proper description of the error
 - Errors are displayed in a helpful way. So that it becomes easy for the user to debug and fill proper input.

The screenshot shows a web browser window with the address bar displaying `127.0.0.1:5502/register.html`. The page features a navigation bar with links: Home, About US, Course (highlighted), and Contact US. The main content area contains a "SIGNUP FORM" with the following fields:

- Username**: A text input field.
- Email Address**: A text input field with a validation error message: "Please fill out this field." (indicated by an orange exclamation mark icon).
- dd/mm/yyyy**: A date input field with a calendar icon.
- Phone Number**: A text input field.

Below the fields is a "Sign Up" button with a blue-to-pink gradient. The browser's taskbar at the bottom shows several open applications, including a file explorer and a terminal.

The screenshot shows a web browser window with the address bar displaying `127.0.0.1:5502/register.html`. The page features a navigation bar with links for Home, About US, Course, and Contact US. The 'Course' link is highlighted. The main content area displays a 'SIGNUP FORM' with the following fields and values:

- Full Name: Naomi Michael
- Email: xemixe@mailinator.com
- Phone Number: +1 (612) 122-2719

A validation error message is displayed below the email field:

! Please include an '@' in the email address. 'xemixemailinator.com' is missing an '@'.

The 'Sign Up' button is located at the bottom of the form.
